Canyon Ranch. healthy living FEELS GREAT
Welcome to Canyon Ranch, where HEALTH, JOY and POSSIBILITY are always in the air.

Each day you get to choose from about 40 classes and activities plus the nearly 200 wellness and spa services listed in this Experience Guide. And, yes, we know that’s a lot. You might not know where to start. My favorite tip: Set an intention for your stay and go from there. You could decide to retool your fitness program, have a nutrition makeover, begin a spiritual journey or take an in-depth look at your health – follow the path that calls to you. And do talk it over with one of our expert Program Advisors. They’ll make suggestions, help you prioritize, schedule appointments and plan an experience that’s perfect for you. I know they’ve steered me right – indoor cycling is my new passion!

Remember, you have a rare opportunity at Canyon Ranch. Beyond being a fabulous vacation, your stay can lead to transformational wellness. Every experience here remains true to the trailblazing vision of Canyon Ranch Founder Mel Zuckerman. He was an overweight, sedentary 50-year-old when he visited a spa and discovered how great healthy living feels. That’s why he opened Canyon Ranch in 1979. He sparked a health and fitness revolution that’s still going strong. I’m proud to be carrying on Mel’s tradition and thrilled that you’re part of it.

To your good health!

Susan E. Docherty
Canyon Ranch Chief Executive Officer

Assessments

Balance Assessment
Using state-of-the art Biodex® equipment, an exercise physiologist will assess your fall risk, balance, proprioception (your sense of where you are in space). You’ll take home a targeted prescription plan to improve balance and mind-body communication. 50 minutes.

Body Composition Screening
With a quick and easy test, our Bod Pod® device will accurately measure your body fat percentage and lean body mass. An exercise physiologist will review and explain your results. Please bring tight-fitting sports clothes or a bathing suit. 25 minutes.

Comprehensive Exercise Assessment
Part I – Begin with an extensive assessment of your fitness. Tests include a Bod Pod® body composition analysis, flexibility testing, upper- and lower-body strength assessment, and a submaximal treadmill test to estimate aerobic capacity.

Note: For body composition testing, please bring tight-fitting sports clothes or a bathing suit. 50 minutes.

Part II – An exercise physiologist reviews your test results with you and compares them to norms for your age. Together, you’ll develop an exercise prescription for improving fitness in areas important to you. 50 minutes.
**DISCOVER YOUR FITNESS AGE**

How old you are and how old you feel may be two different things. Your fitness age is an indication of how well your body is performing with the passage of time. By learning your fitness age in each of five areas, you’ll discover which areas stand to benefit most from your attention.

Note: For body composition testing, please bring tight-fitting sports clothes or a bathing suit.

**Part I** – An exercise physiologist will administer the following tests:
- Bod Pod® body composition to assess fat and lean muscle mass.
- Submaximal exercise test to estimate aerobic fitness level and VO2 max.
- Muscle strength and power testing, including upper and lower body.
- Evaluation of balance.

50 minutes.

**Part II** – An exercise physiologist reviews your test results and consults with you to design a personalized fitness plan to improve your fitness age. 50 minutes.

**METABOLIC EXERCISE ASSESSMENT**

Determine your aerobic fitness level (VO2 max) and learn how many calories you really burn when you work out. Recommended if you want to change body composition, learn the most effective way to burn body fat, determine anaerobic threshold, increase stamina and fitness or improve sports performance.

**Part I** – An exercise physiologist administers a submaximal exercise test while you exercise on your choice of cardiovascular equipment: treadmill, elliptical trainer, rowing machine or stationary bike. 50 minutes.

Note: This test cannot be performed in a pool.

**Part II** – Your exercise physiologist will explain your results and design an exercise program to maximize your workout and enhance your training program. 50 minutes.

Note: We suggest that you book these assessments prior to arrival. This service is for apparently healthy people with no major risk factors for vascular or heart disease. Men over 45 and women over 55 should speak with a Program Advisor about American College of Sports Medicine® guidelines. You may need to take a Cardiacmetabolic Stress Test first with a physician (see page 25).

CARDIOMETABOLIC STRESS TEST WITH PULMONARY FUNCTION TESTING
A physician uses advanced testing equipment to determine your aerobic fitness level (VO2 maximum), optimal exercise heart rates, anaerobic threshold and accurate calories burned at any given heart rate. This is also a state-of-the-art test for determining the safety of your participation in exercise: You’ll be screened for arrhythmias, EKG changes, exercise-induced asthma, obstructive lung disorders and blood pressure tolerance during exercise. Whether you’re training for a triathlon or just getting started exercising, this service will help you work out safely and efficiently – and get maximum results.

Part I – A physician uses an EKG and metabolic test equipment to measure your oxygen consumption, carbon dioxide production, and cardiac and lung function during exercise. This test can be performed on a treadmill or bicycle. 80 minutes.

Part II – In a follow-up session, an exercise physiologist will interpret your test and create an exercise prescription to meet your health and fitness goals. 50 minutes.

CARDIOVASCULAR PROFILE ASSESSMENT
Determine your cardiovascular disease risk with this one-of-a-kind, noninvasive diagnostic test. The elasticity of your small and large arteries is assessed by collecting blood pressure waveform data produced with each heartbeat. The results can be useful if you have diabetes, hypertension or a family history of these conditions. A physician will assess any cardiovascular risk, develop treatment strategies, and determine whether you need more in-depth testing and follow-up. You’ll be provided with a printout of the results. You may add this test to your routine or comprehensive physical, or schedule it after a discussion with your Canyon Ranch physician during an Optimal Health Consultation.

Part I – Testing. 25 minutes.

Part II – Review of results and treatment options with your Canyon Ranch physician. 25 minutes.

VASCULAR ULTRASOUND
This noninvasive test evaluates blood flow in the arteries and veins outside the heart. It can detect plaque, narrowing, blockages, blood clots, incompetent valves and aneurysms, and provide information regarding cardiovascular and stroke risk level. You’ll discuss your results with a follow-up consultation (required with this service). 25, 50 or 150 minutes.

PREVENTIVE CARDIOLOGY
The number one cause of death in men and women is heart disease. Your Canyon Ranch physician has a full spectrum of services available to determine your risk factors, such as blood lipid levels, biomarkers for diabetes and pre-diabetes, blood pressure, elevated inflammatory markers and lifestyle choices. Existing plaque can be measured with leading-edge diagnostics including CVProfilor®, vascular ultrasound, cardiac stress testing and heart-rate variability testing. With this information, your physician will design a personalized approach to your health care.
**PERSONALIZED MEDICINE**

Customize your health care. A thorough evaluation and diagnostic testing will help determine your medical needs and risks. Your physician will use biomarker evaluation plus genetic studies to design a lifestyle prescription with recommendations meant for you alone.

**NATUROPATHIC MEDICINE CONSULTATION**

Focus on natural ways of preventing illness and addressing chronic health conditions. A comprehensive discussion of your health history, a review of your body’s systems and nontraditional laboratory testing help the naturopathic physician to evaluate you from a natural perspective. Food allergies or intolerances, impaired detoxification, nutritional deficiencies and hormonal imbalances are just a few of the problems that may contribute to conditions such as arthritis, asthma, eczema, allergies, fatigue and lingering infections. Your naturopathic physician can prescribe a treatment plan that may include diet and lifestyle changes, nutritional supplements, herbs, homeopathy and acupuncture. This approach is complementary to traditional treatments.

**OPTIMAL HEALTH CONSULTATION**

Experience truly modern medicine. Integrating the best conventional and complementary approaches, a Canyon Ranch physician guides you toward optimal health using the insights of both Western and Eastern medicine. Address your overall health and specific concerns, such as cardiovascular risk factors, and get a plan to help you prevent disease and possibly reverse existing conditions. Ask about any issues that concern you. You may receive recommendations for laboratory tests that provide a comprehensive view of your health. For an initial consultation, 50 minutes is recommended. A 25-minute consultation is available for limited, specific health issues.

**DEXA BODY COMPOSITION AND BONE DENSITY EVALUATION**

The state-of-the-art DEXA (Dual Energy X-Ray Absorptiometry) scan provides a diagnostic measurement of not only total body fat but also lean tissue (muscle), visceral fat and bone density. This will help your Canyon Ranch providers to work with you in developing a plan to reach and maintain a healthy body weight and maintain bone health.

*Note: This test uses a low level of radiation and requires removal of metal objects from the body.*

**Part I** – A physician administers the test, interprets your results and advises you about reducing your risk for disease. 50 minutes.

**Part II** – In a follow-up session, meet with an exercise physiologist who will interpret the test results and, based on that data, design a personalized exercise program. 50 minutes.

*Note: May be arranged for Body Camp only.*

An overnight sleep study is helpful for assessing multiple awakenings, snoring, possible sleep apnea and unexplained daytime sleepiness. *Note: Polysomnography may be covered by your medical insurance plan.*

### MEDICAL SLEEP DISORDER CONSULTATION

**SHOCKWAVE & LASER THERAPY**
By applying sound waves to an injured site on the body, this treatment can help relieve musculoskeletal pain or injury. The sound therapy breaks up scarring that has penetrated tendons, ligaments and other soft tissues, and reactivates the natural healing process. Laser may be combined with shockwave to enhance healing – it’s noninvasive and nonsurgical, with virtually no side effects – or used individually. A Musculoskeletal & Joint Assessment is required prior to treatment. Number of Shockwave and/or Laser Therapy sessions varies according to need. **25 minutes.**

GET THE MOST FROM YOUR MASSAGE

- Give yourself plenty of time before your massage so you can enjoy the steam room, sauna or whirlpool. Warm muscles benefit most from bodywork.

- Unless the service description specifies that your massage will be received clothed, we recommend that you undress completely and wear a robe to your massage. You will be able to take your robe off and cover yourself in privacy. You will be draped with a sheet throughout the service to preserve modesty. For services that are received clothed, light, loose-fitting clothes are ideal.
- We use fragrance-free massage oil; lotion is available on request.
- Communication is the key to getting the massage you want. During your massage, let your therapist know if you feel any discomfort.
- Because every body is different, our multitalented massage staff is devoted to giving you a massage that satisfies your specific needs. Please communicate with your therapist and listen to your body.
- Close your eyes and allow your mind and body to enjoy the quiet. Focus on how you feel. Breathe deeply and let tension slip away with each breath. Remember, this time is for you.

Ayurvedic Treatments

ABHYANGA
This full-body ayurvedic-style massage is performed by two therapists in synchronistic rhythm using warm sesame oil. Subtle points of energy are addressed on the face and feet simultaneously to balance body, mind and spirit. This traditional therapy releases toxins, enhances immunity, nourishes the skin and creates a sense of well-being. 50 minutes.

Combine with a Shirodhara for a truly memorable experience.

BINDI-SHIRODHARA
Based on traditional principles, this treatment is designed to restore balance to body and mind. Special oils corresponding to your body type (dosha) and an herbal masque prepare you for the Shirodhara – warm oil over the third eye and scalp. Then, an Indian balancing bowl is rolled along the soles of your feet, restoring harmony. The powerful combination of herbal infusions, light ayurvedic massage and energy work cleanses your skin, invigorates your spirit and rejuvenates your energy. 100 minutes.

SHIRODHARA
This classic treatment induces a light state of meditation as a stream of warm, herb-infused oil is poured over the third eye. Feel the serenity as the warm oils nourish your hair and scalp. An Indian balancing bowl, used on the soles of your feet, soothes the spirit and helps balance your body’s energies. 50 minutes.

Body Treatments

COCONUT MELT
This intoxicating experience evokes the feeling of the tropics, using warm coconut poultices. A bundle of pure coconut is steamed and applied to the skin using techniques that relax the body and help the oil penetrate the skin. Coconut oil is known for its antioxidant and anti-aging properties, leaving skin soft, smooth and supple. 50 minutes.

CONDITIONING BODY SCRUB
Renew your skin with a scrub that leaves it feeling soft and velvety smooth regardless of your skin type. Enjoy the many features of water and warmth from our experiential spa treatment table. 50 minutes.

DETOXIFYING HERBAL WRAP
Herbal therapies help relieve muscle stiffness and joint soreness, promote relaxation and aid in detoxification. In this treatment, you’ll be wrapped in warm, steamy sheets soaked in herbs and receive a brief energy point and scalp massage. 25 minutes for one, or allow 40-45 minutes for a two-person, side-by-side experience.

DETOXIFYING RITUAL
Retreat into a ritual of heat and pure scent for an intense therapeutic transformation. You’ll be deeply cleansed with Moroccan mint tea and silt purifier, and vigorously scrubbed with coffee, olive stones and lemon. A rich rhassoul clay will then be applied to draw out impurities. You’ll recharge with quince and orange blossoms, then have all this goodness sealed in with essences of cardamom, jasmine, bergamot, amber and clove. Concludes with a massage. 100 minutes.
**EARTH & SEA COCOON**
Long recognized for its ability to calm, soothe and balance, this mineral- and trace element-rich masque uses earth and sea products to ease aching muscles and nurture skin. **EUPHORIA – DEEP CALMING RITUAL**
Enter into a euphoric state with this elegant body treatment designed to calm the nervous system and relax the mind. Your journey begins with a sage compress for your face and an aromatherapy scalp massage. After your therapist applies a warm botanical body masque, then gently buffs it away, you’ll be immersed in a soaking tub with our special aromatherapy blend. Concludes with a massage. 100 minutes.

**HYDRATING DESERT RITUAL**
Rejuvenate your skin and serenade your senses with native resources from the Sonoran Desert. You’ll cleanse, exfoliate and hydrate with white sage, prickly pear and honey. Soak in a bath infused with saguaro blossoms, aloe and jojoba. A perfect blend of indulgence and therapeutic benefit, this treatment concludes with a full-body massage to leave you refreshed and softened. 100 minutes.

**MUSCLE RESCUE RITUAL**
This purposeful ritual is devoted to relieving muscle aches, pain and stiffness. Tension dissolves as you’re exfoliated with a salt scrub enriched with essential oils. An aromatic mineral bath soak detoxifies, soothes and relieves tension while preparing your muscles for a deep-tissue, full-body or focused-area massage. 100 minutes.

**OMEGA BODY BUFF**
Buff away your stress with this effective scrub designed to promote circulation, exfoliate dry skin and moisturize. Omega-3 anti-inflammatory oils will keep your skin nourished all day long. It’s the superfood your skin needs to stay firm and elastic. Suitable for all skin types. 50 minutes, or 80 minutes for our maternity guests.

**TREE OF LIFE PURIFYING RITUAL**

Eastern Therapies

ASHIATSU – BAREFOOT MASSAGE
From the Japanese words “ashi,” meaning foot, and “atsu,” meaning pressure, this is an incredibly relaxing and deep massage therapy. BAREFOOT TABLE THAI
Flowing and rhythmic, this treatment is a fusion of traditional Thai stretching and Ashiatsu compression massage techniques. It’s for anyone seeking help with flexibility, training for sporting events, relief from back and hip pain or deep relaxation. THAI MASSAGE
Sometimes called “yoga massage,” Thai massage originated in Buddhist monasteries as preventive health care for the monks. Using slow, gentle rocking movements, the therapist applies compression with thumbs, palms, elbows, knees and feet to stretch soft tissues and harmonize vital energies.
