WHEN’S THE LAST TIME YOU HAD A REAL ADVENTURE?

Our Rock Climbing Naturally takes you to new heights in achievement, self-confidence and pure excitement.

Ranch experts take you into the nearby Catalina Mountains – which draw climbers from around the world – to a perfect spot for climbers of all levels. All equipment is provided. You’ll get detailed instruction, supervision and plenty of encouragement as you conquer your part of the mountain.

Take home a well-earned sense of accomplishment, great pics and a new swagger.

Call Ext. 4355 to get started.

Outdoor Sports
You step on a scale and you see a number. The number tells you what you weigh, but not much else. How much of that number can be attributed to fat? How much is lean mass? The answers to these questions can help determine your diet and exercise strategies.

That's where the Bod Pod® steps in. Or, rather, here's where you should step into the Bod Pod. Wear tight-fitting clothing or a swimsuit and take a seat inside for just 40 seconds—the windowed, rounded door closes above you, and you simply breathe.

With your body composition accurately measured, a Canyon Ranch exercise physiologist reviews your results, explains what they mean and helps you set health and wellness goals. You can have a Bod Pod assessment each time you visit the Ranch to help you track your progress.

**How do you prepare for the screening?**

- It's simple—avoid eating or drinking large amounts of food or liquid an hour prior to testing. Avoid strenuous exercise (sweating) 30 minutes prior to testing.
- Wear minimal formfitting clothing—bathing suit or sports bra and tight shorts are ideal.
fitness
Check the Daily Schedule for all included fitness classes and activities. Download the free Canyon Ranch Energy app for details on class locations. The app syncs with most fitness trackers and calculates your caloric burn, heart rate and more.

**ASSESSMENTS WITH AN EXERCISE PHYSIOLOGIST**

**BODY COMPOSITION SCREENING**
**25 minutes | $99**
With a simple eight-minute test, our Bod Pod® device will accurately measure your body fat and lean body mass percentages. An exercise physiologist will review and explain your results. *Please bring a tight-fitting bathing suit; for women, tights and sports bra are acceptable.*

**TARGET HEART RATE DETERMINATION**
**50 minutes | $179**
Forget the old heart rate charts and tables. An exercise physiologist takes you through a submaximal exercise test while you wear a heart rate monitor to accurately determine your training zones for steady-state and interval-training. These zones will be incorporated into your exercise prescription.

**BLOOD LACTATE THRESHOLD NEW**
**Two-part service | $399**
Get the most out of your exercise. The level of lactic acid in your blood tells you if you’re working over or under your target cardio intensity. This clinical test determines the five training zones that optimize aerobic conditioning, maximize fitness improvement and fat burning, and improve exercise performance.

- **Part I (50 minutes)** – You wear a heart rate monitor for this 20- to 30-minute test on your choice of exercise equipment. Your exercise physiologist gradually increases intensity and takes a fingertip blood sample every four minutes.
- **Part II (50 minutes)** – Meet with your exercise physiologist to discuss test results and devise an exercise plan based on your five training zones. Take home a prescription to improve aerobic stamina, your anaerobic threshold, weight loss efficiency and maximum training results.

**BALANCE ASSESSMENT**
**50 minutes | $199**
Using state-of-the-art Biodex equipment, an exercise physiologist assesses your fall risk, balance and proprioception (your sense of where you are in space). You’ll receive a targeted plan to improve balance and mind-body communication.
COMPREHENSIVE EXERCISE ASSESSMENT  
Two-part service | $399
Find out how your fitness level compares with others your age. You can retake these tests over time to see the impact of your exercise program.

Part I (50 minutes) – Physical assessment:
- Bod Pod® body composition test*
- Submaximal treadmill test to estimate VO2 max and determine target heart rate
- Upper body chest-press strength test
- Lower body leg-press strength test
- Sit-and-reach flexibility test

Part II (50 minutes) – Your exercise physiologist gives you a full review of all test results and a personalized exercise prescription to meet your goals.

DISCOVER YOUR FITNESS AGE  
Two-part service | $399
How old you are and how old you feel may be two different things. Your fitness age is an indication of how well your body is performing with the passage of time. By learning your fitness age in each of five areas, you’ll discover which areas stand to benefit most from your attention.

Part I (50 minutes) – An exercise physiologist will administer the following tests:
- Body composition to assess fat and lean muscle mass.
- Bod Pod® body composition test*
- Submaximal treadmill test to estimate VO2 max and determine target heart rate
- Muscle endurance and power testing, including vertical jump and bench-press endurance test
- Dynamic balance assessment

Part II (50 minutes) – Your exercise physiologist reviews your test results and consults with you to design a personalized fitness plan to improve your fitness age.

*Note: For body composition testing, please bring a tight-fitting bathing suit; for women, tights and sports bra are acceptable.

METABOLIC EXERCISE ASSESSMENT  
Two-part service | $399
Learn exactly how many calories you burn when you work out. Testing with our metabolic cart gives you an actual, rather than estimated, measurement of your VO2 capacity. Recommended if you want to change body composition, learn the best way to burn body fat, or increase stamina to improve sports performance.

Part I (50 minutes) – You take a metabolic exercise test on your choice of treadmill, bike, elliptical trainer or rowing machine. You wear a mask that analyzes expired breath for accurate measurement of oxygen burn, carbon dioxide produced and more.

Part II (50 minutes) – Your exercise physiologist explains test results concerning your VO2 maximum, calories burned per minute, training heart rates, anaerobic threshold and fat versus carbohydrates burned during exercise. Take home a personalized training prescription.

Recommended for weight loss, fat burning, cardiovascular fitness, or improved biking or running performance.

Note: This service is for apparently healthy people with no signs or symptoms of existing heart disease. Men over 45 and women over 55 should speak with a Program Advisor or exercise physiologist about American College of Sports Medicine® guidelines. You may need to take a Cardiometabolic Stress Test first with a physician (see page 25).

MAT: MUSCLE ACTIVATION TECHNIQUE  NEW
50 minutes  |  $199
Based on the Roskopf Principle – “Muscle tightness is secondary to muscle weakness” – MAT therapy is a systematic approach for evaluating and correcting muscular imbalances that contribute to stiffness, injury and pain, tight or weak muscles and compromised movement. You can see immediate improvement in function and movement – and aim toward long-term relief of muscle tightness and joint pain.

Most people don’t expect a resort’s staff to include leading-edge health experts.

But no other resort is Canyon Ranch.

Canyon Ranch is the place to turn a fabulous vacation into a transformative opportunity. Medical Director Stephen Brewer, MD, talks about the possibilities available to you:

**Q. How does a Health & Healing Center fit into a resort vacation?**

**Dr. Brewer:** Perfectly. Wellness is at the core of everything Canyon Ranch does. Our medical team includes board-certified physicians who put integrative and preventive care first. We focus on trying to prevent diseases before they occur versus traditional medicine, which often treats diseases after they’re already developed.

Think of it: You’re lucky to get fifteen minutes with a doctor at home – so there’s no time to investigate a concern beyond the first question or two. Here we spend close to an hour with you, asking questions and digging deeper. It helps us find answers others might miss.

Our setting is highly professional yet not clinical feeling. The stress-free Canyon Ranch environment is naturally therapeutic.

**Q. What kind of treatment can you prescribe?**

**Dr. Brewer:** Our best prescription is always prevention. We do sophisticated early-detection tests here, like an ultrasound that reveals plaque before coronary symptoms show up. Then we offer medical or lifestyle solutions as powerful prevention tools. Why wait?

Many guests come to us, too, with diagnosed conditions. We help them manage chronic illness with a diverse range of wellness experts. We could prescribe medication, or we may offer alternatives. I might refer someone with chronic low energy to a nutritionist. Someone with high stress could benefit from yoga. I saw a woman who had nonstop migraines for four weeks. Medications weren’t helping. I probed more and found out her sister moved in with her – four weeks ago. Diagnosis made.

**Q. Why would someone choose this on vacation?**

**Dr. Brewer:** Vacations are a way of treating yourself well. This goes beyond that. This is a way to treat your mind, your body and your future really well. You have the chance to really explore your health. If there are any concerns, you learn what you can do. Just as important – you learn how you can do it.

Our team is here to support you and give you practical tools for making lasting changes. And you get to start practicing those changes right here, right now. That’s treating yourself well.

Please stop by the Health & Healing Center while you’re here. To make an appointment, call Ext. 4419.

Experience truly modern medicine. Integrating the best conventional and complementary approaches, a Canyon Ranch physician guides you toward optimal health using the insights of both Western and Eastern medicine. Address your overall health and specific concerns, such as cardiovascular risk factors, and get a plan to help you prevent disease and possibly reverse existing conditions. Ask about any issues that concern you. You may receive recommendations for laboratory tests that provide a comprehensive view of your health.
CARDIOMETABOLIC STRESS TEST WITH PULMONARY FUNCTION TESTING  
Two-part service  |  $989  
A physician uses advanced testing equipment to determine your aerobic fitness level (VO2 maximum), optimal exercise heart rates, anaerobic threshold and exact calories burned at any given heart rate. This is also a state-of-the-art assessment for determining the safety of your participation in exercise: You’ll be screened for arrhythmias, EKG changes, exercise-induced asthma, obstructive lung disorders and blood pressure tolerance during exercise. Whether you’re training for a triathlon or just getting started exercising, this service will help you work out safely and efficiently – and get maximum results.  
Part I (100 minutes) – A physician uses an EKG and metabolic test equipment to measure your oxygen consumption, carbon dioxide production and cardiac and lung function during exercise. This test can be performed on a treadmill or bicycle.  
Part II (50 minutes) – In this follow-up session, an exercise physiologist interprets your test results and creates an exercise prescription to meet your health and fitness goals.

DEXA BODY COMPOSITION  
Two-part service  |  $559  
The accurate assessment of body composition will help your physician, nutritionist and exercise physiologist work with you in developing a plan to reach and maintain a healthy body weight. It measures not only total body fat but lean tissue and visceral fat. Although this test uses radiation, the amount is minimal; the radiation from 135 DEXA body composition measurements are equivalent to that from one chest X-ray.  
Part I (25 minutes) – A physician administers the test and advises you about reducing your risk for disease.  
Part II (50 minutes) – In a follow-up session, meet with an exercise physiologist who interprets the test data and helps you set realistic goals for muscle mass and body fat levels.

OSTEOPOROSIS PREVENTION & BONE DENSITY EVALUATION  
Two-part service  |  $849  
Bone loss (osteopenia or osteoporosis) puts both men and women at risk for spine and hip fractures, a common cause of late-life pain and immobility.  
Part I (50 minutes) – Your physician evaluates your bone mineral density using DEXA technology, then explains your results and offers recommendations. For women, this can help in making decisions about hormone replacement therapy, other medications and exercise programs. Younger women at risk for osteoporosis can use these test results as a baseline in health planning. Men at risk, smokers and people over 60 should also consider this service – at-risk individuals receive valuable advice about exercise and calcium replacement.  
Part II (50 minutes) – An exercise physiologist interprets your test data and helps you design an exercise program to build muscle mass, increase bone density and reduce risk of osteopenia/osteoporosis.

VASCULAR ULTRASOUND  
Two-part service  |  Varies  
25 minutes/Carotid  |  $499  
50 minutes/Carotid and CIMT  |  $999  
150 minutes/Comprehensive  |  $2599  
25-minute follow-up appointment with a physician  |  $299  
Part I (varies) – This noninvasive testing evaluates blood flow in the arteries and veins outside the heart. It can detect plaque, narrowing, blockages, blood clots, incompetent valves and aneurysms, and provide information regarding cardiovascular and stroke risk level.  
Part II (25 minutes) – Results of your ultrasound test are reviewed and discussed with a physician during this follow-up consultation.
NATUROPATHIC MEDICINE CONSULTATION
50 minutes  |  $419
Focus on natural ways of preventing illness and addressing chronic health conditions. A comprehensive discussion of your health history, a review of your body’s systems and nontraditional laboratory testing help the naturopathic physician to evaluate you from a natural perspective. Food allergies or intolerances, impaired detoxification, nutritional deficiencies and hormonal imbalances are just a few of the problems that may contribute to conditions such as arthritis, asthma, eczema, allergies, fatigue and lingering infections. Your naturopathic physician can prescribe a treatment plan that may include diet and lifestyle changes, nutritional supplements, herbs, homeopathy and acupuncture. This approach is complementary to traditional treatments.

SEXUAL HEALTH CONSULTATIONS
50 minutes  |  single $499 / duet $299 /person
Enhance your sexual function and your enjoyment of this important part of life. Choose a private consult in one of the following areas:

Physical Factors – Coping with disabilities, effects of medication and menopause.

Sexual Health for Men and Women – Discuss approaches to help improve your sexual functioning and enjoyment.

SLEEP MEDICINE
Emerging evidence supports a link between disrupted sleep and risk of heart disease, diabetes, atrial fibrillation, ADHD, cognitive decline and chronic pain. Treating sleep disorders may improve management of these conditions and contribute to better overall health and well-being. If you’re unable to fall asleep or wake up too early, we recommend a Sleep Enhancement Consultation with a Life Management expert.

MEDICAL SLEEP DISORDERS
25 minutes/50 minutes  |  $299/$499
Our physicians assess the nature of your sleep problems and recommend diagnostic and treatment options. If you have daytime sleepiness, wake up often during the night, wake up tired or if you snore, schedule this consultation early in your stay to allow time for additional testing.

The following two services are available after scheduling a Medical Sleep Disorders or Optimal Health Consultation and consulting with one of our physicians.

SLEEP SCREENING  NEW
Overnight with follow-up  |  $799
This unmonitored overnight sleep screening test, done in the comfort of your resort room, uses an FDA-approved portable sleep device to determine periods of apnea and wake/sleep states by using Peripheral Arterial Tone, a physiological signal that mirrors changes in the autonomic nervous system caused by respiratory disturbances during sleep. A physician will review the results of your sleep screening test with you and make recommendations for treatment.

ALL-NIGHT SLEEP STUDY (POLYSOMNOGRAPHY)
Overnight with follow-up  |  $2949
An overnight sleep study is helpful for assessing multiple awakenings, snoring, possible sleep apnea and unexplained daytime sleepiness. This formal study is performed by a certified technician in the on-site Canyon Ranch sleep lab, which has all the comforts of our resort rooms. A physician board-certified as a sleep specialist reviews the results with you and makes recommendations for treatment. Note: Polysomnography may be covered by your medical insurance plan.

SHOCKWAVE & LASER THERAPY
25 minutes | Varies

A Musculoskeletal & Joint Assessment is required prior to treatment. Number of Shockwave and/or Laser Therapy sessions varies according to need.

They also may be helpful in treating bunions, corns, hammertoes, sore arches, plantar fasciitis, sore ankles, shin splints and more.

Get the most from your massage

- Give yourself plenty of time before your massage so you can enjoy the steam room, sauna or whirlpool. Warm muscles benefit most from bodywork.

- A warm shower just before your massage is relaxing and washes away any salts, minerals or chemicals that could clog pores when mixed with massage oils. Then, put on your robe and meet your therapist in the locker room waiting area.

- Unless the service description specifies that your massage will be received clothed, we recommend that you undress completely and wear a robe to your massage. You will be able to take your robe off and cover yourself in privacy. You will be draped with a sheet throughout the service to preserve modesty. For services that are received clothed, light, loose-fitting clothes are ideal.

- We use fragrance-free massage oil; lotion is available on request.

- Communication is the key to getting the massage you want. During your massage, let your therapist know if you feel any discomfort.

- Because every body is different, our multitalented massage staff is devoted to giving you a massage that satisfies your specific needs. Please communicate with your therapist and listen to your body.

- Close your eyes and allow your mind and body to enjoy the quiet. Focus on how you feel. Breathe deeply and let tension slip away with each breath. Remember, this time is for you.

**GO GREEN**

Water is the Sonoran Desert’s most precious resource. To conserve, please leave towels you don’t need laundered on the hooks. Anything on the floor will be washed. Sheets are washed by request.

**PRIVACY, PLEASE**

At Canyon Ranch, we respect your privacy. To help maintain that feeling of trust and discretion for everyone, please don’t take pictures of other guests without asking permission first.

**SAFETY & SECURITY**

Our team is always on the job and available when you need them. Call Ext. 4331 anytime for an escort to take you to any Ranch location. Please note that we’re required to check on you if your phone’s been left off the hook, or if you don’t respond to a wakeup call you requested.

**CUSTOM COMFORTS**

Please let us know if you’d like a humidifier, heating pad, bed board or electric blanket brought to your room. Anything else? Simply call Ext. 4367.

**YOUR VALUABLES**

You’ll find a safe in your room and a safety deposit box in the Clubhouse. There’s no charge, and we encourage you to use them.

**COMMON SCENTS**

We love your natural aroma. Really. And some people are allergic to fragrances. So please refrain from using perfume or cologne in public places.

**LAUNDRY & DRY CLEANING**

We provide self-service washers, dryers, detergents, bleach and fabric softeners in easy-to-spot locations near the Clubhouse, next to the T-Pool and near Room 509. For laundry and dry-cleaning service, please use the plastic laundry bag in your closet.

**CLEAR THE AIR**

Smoking cigarettes or e-cigarettes is allowed only in designated outdoor, nonpublic areas. Cigars and pipes are not allowed. Smoking in your room will result in a cleaning fine of up to $2,000, excluding any damages.

**POOL TIME**

Pools are open 6 am to 10 pm daily. No lifeguards are on duty. For your safety, we close the pools when lightning is in the area.

**QUIT FOR GOOD**

Schedule a complimentary consultation to help set you on the path to quitting smoking. To take advantage of this opportunity, please call Program Advising at Ext. 4338.

BE AWARE, BE SAFE

The Sonoran Desert is home to fascinating wildlife. Enjoy watching them, watch where you walk, and keep your distance.

Javelinas travel in herds and will normally avoid you, but can be protective if you get near their babies.

If you see a bobcat or (extremely unlikely) a mountain lion, maintain eye contact and back away slowly. Do not run. And never walk barefoot in the desert.

NEVER feed, touch or bother any wildlife you see here.

It’s dangerous, against the law – and it’s exciting enough just to see them.
