TO CANYON RANCH TUCSON

We’re delighted that you have arrived at our little corner of the world. This is a spectacular time of year for renewing dreams, refreshing optimism and setting a course for personal fulfillment. It’s also a great time for enjoying nature, hiking, cycling or just taking some well-deserved quiet time.

Whether it’s your first or twentieth time here, there’s always something new to explore. Take that wild leap that will surprise family and friends back home. Invest time in wellness presentations, workshops and spa services – just because it’s you and it’s your time.

The entire Canyon Ranch family is eager to help in any way to make your visit perfect. This is our home, and we want it to be your home away from home as well.

We look forward to seeing you around the Ranch and hearing about your experiences.

CANYON RANCH 101

With so many activities to choose from every day, it can help to set a specific intention for your Canyon Ranch stay. Soon after you arrive, visit with a Program Advisor, who will help you plan a personalized schedule that makes the most of your time. Be sure to include some new experiences while you’re here. The best thing you do may be something you haven’t tried yet!

Please check video boards near the Spa Desk and Canyon Ranch Grill™ for last-minute changes. As a courtesy to other guests, please do not enter talks or fitness classes five or more minutes after the class begins. Assistive Listening Devices for people with hearing challenges are available upon request (24 hours in advance) from Guest Services.

Visit Program Advising or call Ext. 4338, 7 am – 7 pm daily.

CELLPHONES & MOBILE DEVICES

As a courtesy to all guests, talking on phones is permitted only in your private room, on your patio and in designated areas. Otherwise, please keep mobile devices on “silent” mode.

Feel free, of course, to take photos of your favorite spots around the Ranch. Share them with people back home, too. #LiveCanyonRanch.

Canyon Ranch is more than a beautiful place – it’s a haven of wellness, where diverse experts share their wealth of knowledge with you and with each other. Where you get the unhurried attention of top professionals, who can help you reach your goals. Whatever those are and whatever it takes.

Our experts are all members of Team YOU. So a physician might refer you to a spiritual wellness provider. An exercise physiologist could recommend a nutrition consult. And a fitness instructor may partner with a life management expert to help you train for a big event you have in mind.

See how it works? Now see it at work. Our experts are friendly, accomplished and eager to meet you.

Exercise Physiology

What is an exercise physiologist?

An exercise physiologist is a health professional focused on prevention of issues that result from sedentary lifestyle – from heart disease to osteoporosis – and on performance, to help you meet a personal goal, whether it’s finishing a marathon, keeping up with grandkids or just feeling good.

At Canyon Ranch we hire only exercise physiologists with a four-year college degree in anatomy, physiology or biology plus a two-year master’s degree in exercise physiology. They’re experts at conducting and interpreting test results and can create a personalized fitness program for you.

ASSESSMENTS WITH AN EXERCISE PHYSIOLOGIST

BODY COMPOSITION SCREENING
25 minutes  |  $99

With a simple eight-minute test, our Bod Pod® device will accurately measure your body fat and lean body mass percentages. An exercise physiologist will review and explain your results. Please bring a tight-fitting bathing suit; for women, tights and sports bra are acceptable.

TARGET HEART RATE DETERMINATION
50 minutes  |  $179

Forget the old heart rate charts and tables. An exercise physiologist takes you through a submaximal exercise test while you wear a heart rate monitor to accurately determine your training zones for steady-state and interval training. These zones will be incorporated into your exercise prescription.

Optional Add-On
25 to 50 minutes

You may schedule follow-up sessions with your exercise physiologist to reinforce your regimen and support your health through exercise. Choose in-person or phone coaching.
BLOOD LACTATE THRESHOLD  NEW
Two-part service  |  $399
Get the most out of your exercise. The level of lactic acid in your blood tells you if you’re working over or under your target cardio intensity. This clinical test determines the five training zones that optimize aerobic conditioning, maximize fitness improvement and fat burning, and improve exercise performance.

Part I (50 minutes) – You wear a heart rate monitor for this 20- to 30-minute test on your choice of exercise equipment. Your exercise physiologist gradually increases intensity and takes a fingertip blood sample every four minutes.

Part II (50 minutes) – Meet with your exercise physiologist to discuss test results and devise an exercise plan based on your five training zones. Take home a prescription to improve aerobic stamina, your anaerobic threshold, weight loss efficiency and maximum training results.

BALANCE ASSESSMENT
50 minutes  |  $199
Using state-of-the art Biodex equipment, an exercise physiologist assesses your fall risk, balance and proprioception (your sense of where you are in space). You’ll receive a targeted plan to improve balance and mind-body communication.

COMPREHENSIVE EXERCISE ASSESSMENT
Two-part service  |  $399
Find out how your fitness level compares with others your age. You can retake these tests over time to see the impact of your exercise program.

Part I (50 minutes) – Physical assessment:
- Bod Pod® body composition test* to measure body fat and fat-free mass
- Submaximal treadmill test to estimate VO2 max and determine target heart rate
- Upper body chest-press strength test
- Lower body leg-press strength test
- Sit-and-reach flexibility test

Part II (50 minutes) – Your exercise physiologist gives you a full review of all test results and a personalized exercise prescription to meet your goals.

DISCOVER YOUR FITNESS AGE
Two-part service  |  $399
How old you are and how old you feel may be two different things. Your fitness age is an indication of how well your body is performing with the passage of time. By learning your fitness age in each of five areas, you’ll discover which areas stand to benefit most from your attention.

Part I (50 minutes) – An exercise physiologist will administer the following tests:
- Bod Pod® body composition test* to measure body fat and fat-free mass
- Submaximal treadmill test to estimate VO2 max and determine target heart rate
- Muscle endurance and power testing, including vertical jump and bench-press endurance test
- Dynamic balance assessment

Part II (50 minutes) An exercise physiologist reviews your test results and consults with you to design a personalized fitness plan to improve your fitness age.

‘Note: For body composition testing, please bring a tight-fitting bathing suit; for women, tights and sports bra are acceptable.

EXERCISE AS MEDICINE  NEW
Two-part service  |  $399
Whether you’re new to exercise or have been recently diagnosed with a chronic condition, you’ll get clear, actionable guidance from a specially trained ACSM-Registered Clinical Exercise Physiologist. Learn how to exercise safely and effectively – using minimal equipment – to reach your fitness and health goals.

Part I (50 minutes) – The exercise physiologist thoroughly reviews your exercise and health history. The goal is to customize a fitness routine and care plan that supports cardiovascular risk reduction, symptom management, medication mindfulness, exercise adherence and motivation. Additional services may be recommended for maximum results.

Part II (50 minutes) – In this one-on-one session, your exercise physiologist provides you with the tools and techniques that are most effective and safest for you. You’ll take home practical tools to support your health while working toward your fitness goals.
METABOLIC EXERCISE ASSESSMENT
Two-part service  |  $399

One telling measurement of a person’s health and wellness is the ability to burn oxygen – commonly called aerobic fitness or VO2 maximum. This assessment measures your VO2 max. In addition, we find out the number of calories burned per minute at any heart rate, and learn about your fat versus carbohydrate burning, anaerobic threshold and ideal target rate for fitness improvement and fat burning.

**Part I (50 minutes)** – You take a metabolic exercise test on your choice of treadmill, bike, elliptical trainer or rowing machine. You wear a mask that analyzes expired breath for accurate measurement of oxygen burn, carbon dioxide produced and more.

**Part II (50 minutes)** – Your exercise physiologist explains test results concerning your VO2 maximum, calories burned per minute, training heart rates, anaerobic threshold and fat versus carbohydrates burned during exercise. Take home a personalized training prescription.

Recommended for weight loss, fat burning, cardiovascular fitness, or improved biking or running performance.

*Note: This service is for apparently healthy people with no signs or symptoms of existing heart disease. Men over 45 and women over 55 should speak with a Program Advisor or exercise physiologist about American College of Sports Medicine® guidelines. You may need to take a Cardiometabolic Stress Test first with a physician (see page 25).*

HEALTH & HEALING HAPPENS HERE

the DOCTORS are in

How can a doctor’s appointment make your vacation even better?
It happens all the time around here. Our team is smart, caring and cool. Plus, you get 50 minutes of all-about-you time, when you can get to the heart of what interest you most. It's a high-focus, low-stress experience that could make you healthier for life.

Param Dedhia, MD, has a broad range of expertise including weight loss, gerontology and internal medicine. He's one of the few physicians nationally to be board-certified in sleep medicine. We asked his best advice for a good night's sleep:

In our nonstop, 24-7 world, the first step is to prioritize sleep, especially getting enough sleep. We live full daytime lives, so it's important to taper into the night—creating a nightly ritual before bed. Lack of sleep is widespread, and it can limit our physical and mental resilience. A sleep consultation can often find answers to long-term concerns.

Diane Downing, MD, specializes in preventive care, cardiovascular health and integrative medicine. She says her Women's Health Consultation is your chance to talk about what concerns you most:

What topics have been on your mind? Let's go there. We could talk about cardiovascular risk and prevention, digestive concerns, sleep and better health. Or you may want to address something specific: Like how can you reduce risk for breast cancer. And menopause options, including hormone replacement therapy and its alternatives. Or you could have an osteoporosis evaluation and explore treatment options.

Nicola Finley, MD, is board-certified in internal medicine and is expert in integrative care and sexuality. If you choose her popular Sexual Health Consultation, here's what she says you can expect:

In a comfortable setting, you have the opportunity to share your story, your way. Based on that, I offer an integrative approach with specific suggestions to enhance sexual satisfaction and pleasure. We can talk about any concerns you have, including low sexual desire, pain with intercourse, difficulty achieving orgasms, using sex vibrators or toys, and even spirituality. You may find it easier to talk with me than with the physician you see at home. We're all about confidentiality and support here.

Ask about any issues that concern you. You may receive recommendations for diagnostic and laboratory tests that provide a comprehensive view of your health.
CARDIOMETABOLIC STRESS TEST WITH PULMONARY FUNCTION TESTING

Two-part service  |  $989

A physician uses advanced testing equipment to determine your aerobic fitness level (VO2 maximum), optimal exercise heart rates, anaerobic threshold and exact calories burned at any given heart rate. This is also a state-of-the-art assessment for determining the safety of your participation in exercise: You’ll be screened for arrhythmias, EKG changes, exercise-induced asthma, obstructive lung disorders and blood pressure tolerance during exercise. Whether you’re training for a triathlon or just getting started exercising, this service will help you work out safely and efficiently – and get maximum results.

Part I (100 minutes) – A physician uses an EKG and metabolic test equipment to measure your oxygen consumption, carbon dioxide production and cardiac and lung function during exercise. This test can be performed on a treadmill or bicycle.

Part II (50 minutes) – In this follow-up session, an exercise physiologist interprets your test results and creates an exercise prescription to meet your health and fitness goals.

VASCULAR ULTRASOUND

Two-part service  |  Varies
25 minutes/Carotid  |  $499
50 minutes/Carotid and CIMT  |  $999
150 minutes/Comprehensive  |  $2599
25-minute follow-up appointment with a physician  |  $299

Part I (varies) – This noninvasive testing evaluates blood flow in the arteries and veins outside the heart. It can detect plaque, narrowing, blockages, blood clots, incompetent valves and aneurysms, and provide information regarding cardiovascular and stroke risk level.

Part II (25 minutes) – Results of your ultrasound test are reviewed and discussed with a physician during this follow-up consultation.

DEXA BODY COMPOSITION

Two-part service  |  $559

The accurate assessment of body composition will help your physician, nutritionist and exercise physiologist work with you in developing a plan to reach and maintain a healthy body weight. It measures not only total body fat but lean tissue and visceral fat. Although this test uses radiation, the amount is minimal; the radiation from 135 DEXA body composition measurements are equivalent to that from one chest X-ray.

Part I (25 minutes) – A physician administers the test and advises you about reducing your risk for disease.

Part II (50 minutes) – In a follow-up session, meet with an exercise physiologist who interprets the test data and helps you set realistic goals for muscle mass and body fat levels.

OSTEOPOROSIS PREVENTION & BONE DENSITY EVALUATION

Two-part service  |  $849

Bone loss (osteopenia or osteoporosis) puts both men and women at risk for spine and hip fractures, a common cause of late-life pain and immobility.

Part I (50 minutes) – Your physician evaluates your bone mineral density using DEXA technology, then explains your results and offers recommendations. For women, this can help in making decisions about hormone replacement therapy, other medications and exercise programs. Younger women at risk for osteoporosis can use these test results as a baseline in health planning. Men at risk, smokers and people over 60 should also consider this service – at-risk individuals receive valuable advice about exercise and calcium replacement.

Part II (50 minutes) – An exercise physiologist interprets your test data and helps you design an exercise program to build muscle mass, increase bone density and reduce risk of osteopenia/osteoporosis.
NATUROPATHIC MEDICINE CONSULTATION
50 minutes  |  $419
Focus on natural ways of preventing illness and addressing chronic health conditions. A comprehensive discussion of your health history, a review of your body’s systems and nontraditional laboratory testing help the naturopathic physician to evaluate you from a natural perspective. Food allergies or intolerances, impaired detoxification, nutritional deficiencies and hormonal imbalances are just a few of the problems that may contribute to conditions such as arthritis, asthma, eczema, allergies, fatigue and lingering infections. Your naturopathic physician can prescribe a treatment plan that may include diet and lifestyle changes, nutritional supplements, herbs, homeopathy and acupuncture. This approach is complementary to traditional treatments.

SEXUAL HEALTH CONSULTATIONS

SLEEP MEDICINE
Emerging evidence supports a link between disrupted sleep and risk of heart disease, diabetes, atrial fibrillation, ADHD, cognitive decline and chronic pain. Treating sleep disorders may improve management of these conditions and contribute to better overall health and well-being.

MEDICAL SLEEP DISORDERS
25 minutes/50 minutes  |  $299/$499
Our physicians assess the nature of your sleep problems and recommend diagnostic and treatment options. If you have daytime sleepiness, wake up often during the night, wake up tired or if you snore, schedule this consultation early in your stay to allow time for additional testing.

spa
Get the most from your massage

- Give yourself plenty of time before your massage so you can enjoy the steam room, sauna or whirlpool. Warm muscles benefit most from bodywork.

- A warm shower just before your massage is relaxing and washes away any salts, minerals or chemicals that could clog pores when mixed with massage oils. Then, put on your robe and meet your therapist in the locker room waiting area.

- Unless the service description specifies that your massage will be received clothed, we recommend that you undress completely and wear a robe to your massage. You will be able to take your robe off and cover yourself in privacy. You will be draped with a sheet throughout the service to preserve modesty. For services that are received clothed, light, loose-fitting clothes are ideal.

- We use fragrance-free massage oil; lotion is available on request.

- Communication is the key to getting the massage you want. During your massage, let your therapist know if you feel any discomfort.

- Because every body is different, our multitalented massage staff is devoted to giving you a massage that satisfies your specific needs. Please communicate with your therapist and listen to your body.

- Close your eyes and allow your mind and body to enjoy the quiet. Focus on how you feel. Breathe deeply and let tension slip away with each breath. Remember, this time is for you.

**TEEN SERVICES** (ages 14–17)  
All teen services must be booked by the parent or guardian. We require that all guests ages 14–17, along with parent or guardian, meet with a Canyon Ranch Program Advisor or Nurse Educator at the beginning of each stay for guidance and suggestions on making the most of your experience.

**Guidelines for Teens**  
- Lightweight, loose clothing must be worn for teen services (or swimwear for water activities)  
- The parent or guardian must be present for teen services unless otherwise indicated on our Teen Services Menu.  
- If a teen is the only one who signs up for a group workshop, a parent or guardian must accompany him or her.

**MATERNITY**  
Are you expecting? A Program Advisor can provide you with a list of suggested services and recommend those that would be the most valuable for you. You may call 800.877.0404 before your stay, or Ext. 4338 any time while you’re here. Please consult with your physician at home before booking services.
For the **HEALTH** of It

While you’re here, why not take advantage of experiences you won’t find at home? An hour with a nutritionist or life management expert can give you fresh perspective and set you on a healthier path for life. An exercise physiologist can point you toward your next exciting goal. Or you can gain new knowledge in focused services with top experts who feel like friends:

**HOW ARE YOU SLEEPING?**
Have an in-depth Sleep Medicine consultation or an All-Night Sleep Study. A physician specializing in sleep medicine will assess your status and help you get your rest.

**THE POWER OF SOUND.**
Discover the power of sound to soothe, enlighten and touch your spirit. Tryshe Dhevney is specially trained for sound gatherings and selecting the Alchemy Crystal Singing Bowl that’s right for you to own.

**HAD ENOUGH STRESS?**

GO GREEN
Water is the Sonoran Desert’s most precious resource. To conserve, please leave towels you don’t need laundered on the hooks. Anything on the floor will be washed. Sheets are washed by request.

PRIVACY, PLEASE
At Canyon Ranch, we respect your privacy. To help maintain that feeling of trust and discretion for everyone, please don’t take pictures of other guests without asking permission first.

SAFETY & SECURITY
Our team is always on the job and available when you need them. Call Ext. 4331 anytime for an escort to take you to any Ranch location. Please note that we’re required to check on you if your phone’s been left off the hook, or if you don’t respond to a wakeup call you requested.

CUSTOM COMFORTS
Please let us know if you’d like a humidifier, heating pad, bed board or electric blanket brought to your room. Anything else? Simply call Ext. 4367.

YOUR VALUABLES
You’ll find a safe in your room and a safety deposit box in the Clubhouse. There’s no charge, and we encourage you to use them.

COMMON SCENTS
We love your natural aroma. Really. And some people are allergic to fragrances. So please refrain from using perfume or cologne in public places.

LAUNDRY & DRY CLEANING
We provide self-service washers, dryers, detergents, bleach and fabric softeners in easy-to-spot locations near the Clubhouse, next to the T-Pool and near Room 509. For laundry and dry-cleaning service, please use the plastic laundry bag in your closet.

CLEAR THE AIR
Smoking cigarettes or e-cigarettes is allowed only in designated outdoor, nonpublic areas. Cigars and pipes are not allowed. Smoking in your room will result in a cleaning fine of up to $2,000, excluding any damages.

POOL TIME
Pools are open 6 am to 10 pm daily. No lifeguards are on duty. For your safety, we close the pools when lightning is in the area.

QUIT FOR GOOD
Schedule a complimentary consultation to help set you on the path to quitting smoking. To take advantage of this opportunity, please call Program Advising at Ext. 4338.
We Share the Desert

Javelina [javelina] - Our desert is also home to javelinas. Javelinas travel in herds and will normally avoid you, but can be protective if you get near their babies.

If you see a bobcat or (extremely unlikely) a mountain lion, maintain eye contact and back away slowly. Do not run. And never walk barefoot in the desert.

NEVER feed, touch or bother any wildlife you see here.

It's dangerous, against the law — and it's exciting enough just to see them.

BE AWARE, BE SAFE

The Sonoran Desert is home to fascinating wildlife. Enjoy watching them, watch where you walk, and keep your distance.
